

Established over a hundred years ago, alongside the Glane River in Saint-Junien near Limoges, Feutres DEPLAND serves the paper making industry.

Gifted with an exceptional know-how, the company manufactures bespoke specific products out of wool and synthetic fibre.

Feutres Depland produces clothing for all types of paper making machines and woollen laid-in fabrics for Natural Machine-glazed Kraft paper machines.

- **Production Equipment**

- 8 looms including one that is 16m long
- 1 Thermo-fixing oven with temperature control
- 1 needle loom measuring 9 metres coupled with a double card
- 2 Fulling Mills
- 2 Splicing Machines

- **Bespoke manufacturing of many specialities**

- Press section felts with or without joins
- Knitted or woven drying wires
- Woolen or synthetic markers
- Special innovative and personalised products

- **Technical Assistance and Quality Control**

The “Lorentzen & Wettre” humidity measuring apparatus allows a better quality control of the felt on the client’s site.

Regular readings allow an optimal drying guarantee in the press section.

→ +1% of the dry weight in the press section = -4% energy consumption during the drying process

- **New Product Development**

UNDERSTANDING, APPRECIATING, DEVELOPING THE TRADE

Among the capabilities of the workforce are:

- Beaming: arranging the warp threads on to the beam in preparation for weaving
- Thermo-fixing the fabrics
- Weaving according to a defined pattern
- Mending
- Needling
- Fulling

Our workforce also knows how to work on different materials such as wool or even synthetic fibre in order to respond to the diverse specialities of the company:

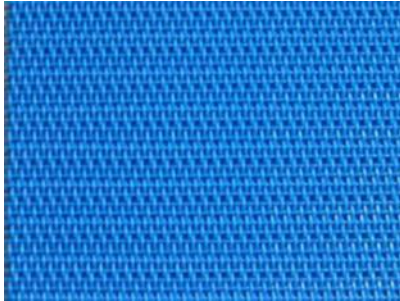

- Knitted or woven fabrics
- Woollen or synthetic markers
- Press felts with or without joins

- Special innovative and personalised products

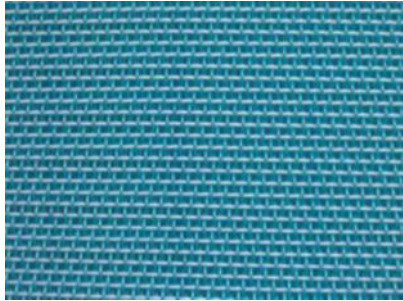

These specialists work on different product ranges, in particular:

- The range of drying wires:

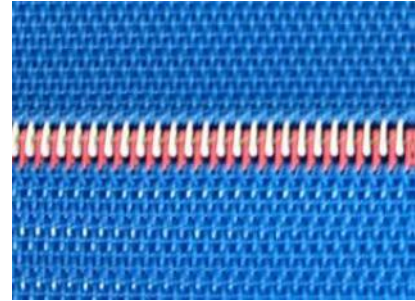

- “Bipland”

- “Elstar”

- “Spiral Join”

- Finishing felts:

- Standard ribbing
weave glazing felt
“Pinstripe”

- Ribbing Weave
Glazing Felt

- « Basket weave »
Glazing felt

The work doesn't end in production, quality checks are carried out in order to measure the humidity of the felts and to offer good quality products.
