

# Finishing

## **This consists of:**

- Cutting the fabric according to the client's request.
- Gluing and joining the edges for better resistance.
- Numbering the product with reference to the direction of travel and the paper's front surface.
- Adding a mounting aid (a zip allowing both ends to be held together) in order to make the operation easier whilst on the papermaking machine.
- Rolling the product and wrapping it in reinforced packaging.
- Shipping or stocking the product depending on client demand.
